# 'British Will Back Us,' Say Arab Leaders

## COUNTING DOWN THE ARMED OVERLORDS

### TRUMAN'S PALESTINE PLAN To Buy British

BY OUR DIPLOMATIC CORRESPONDENT

**ANGRY REACTION TO PRESIDENT TRUMAN'S PROPOSAL THAT 100,000 JEWISH IMMIGRANTS SHOULD BE ALLOWED IMMEDIATELY INTO PALESTINE MOUNTED YESTERDAY.**

Following swiftly the official statement from Whitehall that the British Government took a very serious view of the President's ill-considered action, in view of the efforts made at the Palestine Conference to bring Jews and Arabs together, came statements from leaders of the Arab delegations now in London; and today the Palestine Arab Higher Committee will issue an official reply to the President.

**The Sentenced Nazis**

Nuremberg, Saturday.

**Goering And Co. Plead For Mercy**

THE three acquitted Nazis—Von Papen, Schacht and Fritzsche—are free at last. They are tonight staying at private houses in the city and they can go about as they wish.

**Services Prisoners SPEEDING-UP RELEASES**

A SPEED-UP in release of Servicemen undergoing long sentences for war-time offences has been ordered. Many will be freed this week-end.

**Russia Tries It Again**

New York, Saturday.

A man said here today that the Soviet Government has asked the U.S. to let it have the right to use the question of the presence of Soviet troops in Poland as a bargaining chip.

**Rebels Seize Town**

Teheran, Saturday.

PERSIAN ARMY G.O.S. today admitted the capture by armed tribesmen of the garrison of Khasan, 70 miles north-west of the Persian Gulf port of Bushire, after heavy fighting and severe casualties.

DONALD BROWN, a 37-year-old mother of three, Mrs. Brown, of 100, South Shields, won £6,526 in a football pool.

**TRY THIS—IT'S GOOD!**

Gaze fixately at a point midway between the man and the glass of Guinness. Then move the picture close to your face, and the man will appear to drink the Guinness. After that go and have one yourself...

**Have You Put Your Clock Back?**

Put your clock back 10 minutes at 3 o'clock this morning.

# Railways: Radio: Savoy Hotel: Now— PLANE FACTORY JOINS IN NEW STRIKE FEVER

**STRIKE** fever was spreading yesterday. Workers involved were in aviation, radio factories and railways. In addition, a strike threat has been made by employees of the Savoy Hotel, London, and a dispute over a canteen has led to a strike of workers employed in an instrument factory.

About 150 sheet metal workers at the Bairo Aviation factory, at Hayes, Middlesex, are on strike over one of their members who, they say, has repeatedly transgressed the rules of their union.

Mr. P. A. Foulds, joint secretary of the union, told "The People" yesterday:

"The men have continued to work hours in excess of those agreed between the management and our organisation. In his own words, he refuses to be dominated by mob-law."

A resolution was sent to the management and, as no satisfactory reply was received, the 150 members struck.

Ministry of Labour has been asked to arrange a meeting between the management of the Bairo factory and members of the General and Municipal Workers' Union over recognition of the union.

"I have warned the Ministry that next Thursday is the day for safety," Mr. Arthur Lewis, the union's district organiser, Labour M.P. for Union (West Ham) told "The People."

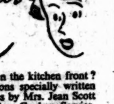

"If nothing is done by then I am afraid that the staff will strike. I want to avoid this if I can."

An official strike of some 300 men engaged in installing the electric signal system on the new extension between Liverpool Street and Ongar has been called for 8 a.m. tomorrow.

A notice posted on the site where the men assemble states that the union is prepared for better conditions, and that precipitate action may hinder them.

ADVERTISERS' ANNOUNCEMENTS

*But surely Mother told you?*

**IT'S BALANCED BLENDING THAT GIVES FOUR SQUARE TOBACCO ITS UNMATCHED COOLNESS AND FLAVOUR**

ONE BLENDING IS NEARLY STRONG

Crankmen of the Southern Railway have refused to work overtime as a protest against the wages agreement covering their terms of employment.

Ministry of Labour stated yesterday that there was no possibility of consultation by the Ministry.

"This agreement was reached between the company and the men's properly accredited representatives, and it is in the interests of the men that the full authority of the constitutional machinery should be maintained," it was stated.

Several thousand workers at the radio factory of Messrs. C. C. Cresser, Highgate, N. will be affected by a strike called for tomorrow.

The decision was taken by the Factory Committee yesterday following the alleged dismissal of five women workers, including a shop steward.

**CANTINEEN DISPUTE**  
Dispute with the management over a back gate and the canteen at the factory has led to a strike of more than 1,000 employees of Messrs. Henry Hughes and Sons, nautical instrument makers, of Barking, Essex.

Mr. Dave Wright, representative of the workers, said: "Following a case of theft, the management closed a back gate which men were permitted to use to save the canteen from being closed and from their work."

"They agreed to reopen it, then changed their mind. We are also dissatisfied with the canteen conditions."

ADVERTISERS' ANNOUNCEMENTS

**Secret Plans Ready**

**End Of £100 Ramp By Small Builders**

A HUSH-HUSH plan to crush the housing black market is to be put into operation all over Britain in the next three weeks.

Experts of the Ministry of Works, who have drawn it up, believe that as a result tens of thousands of building workers, who are at present wasting their time doing unnecessary repairs and decorations to luxury flats and houses, will be diverted to the more vital task of building houses.

Details of the plan will be disclosed this week, at a series of meetings between Ministry of Works officials and representatives of local authorities in the London area.

In the following fortnight details will also be given to representatives of provincial councils. At present, local authorities can act as many licences as they like to local builders for repairs, decorations and odd-jobs costing under £100.

Many small builders have been keeping their men busy by sending them out on scores of these £100 jobs. Sometimes three or four licences, each worth £100, have been obtained for a single house.

**ILLEGAL JOBS**  
When there have not been enough licences to keep their men busy, many of these small builders have not hesitated to send their men out on illegal jobs, costing hundreds of pounds, for which no licence has been granted.

In future, a secret watch is to be kept on illegal work and the number of £100 licences is to be cut by at least 20 per cent.

As a result many small builders will not have enough work on hand to keep their men busy.

The Ministry of Labour will then direct the men to bigger firms which are building new houses.

Experts believe that the plan will drive many small builders out of business.

They regret this—but they say that the nation's need for new houses must come first.

**CONGRATULATIONS**  
"THIS PEOPLE" has pleasure in offering congratulations to the following readers on the occasion of their wedding anniversaries:

## GREATEST AGE OF EXPLORATION HAS BEGUN

### To Moon By 1950, Then Planet Conquest

**WITHIN** fifty years, most of the major bodies in the solar system will have been reached by space ships or guided missiles, and four years from now the first missile may be ready for its journey to the moon—the first challenge of an age of exploration such as man has never known. This forecast was made last night by Mr. Arthur C. Clarke, addressing the British Interplanetary Society on space ships.

Mr. Clarke, a former Flight Lieutenant in the RAF, and now at London University, is one of thousands who will soon be taking part in a great exploration of the universe.

The first missile to be guided to the moon should be ready by 1950, he said. It is expected to reach the moon.

"The public," he said, "not realising the problems to be faced, will expect a number of things to follow in a very short time."

There will be innumerable short-range flights beyond the atmosphere by man-carrying ships reaching heights of a few thousand miles, but there is always the problem of fuel."

Atomic power, he said, was not likely to advance the conquest of space by more than ten years, but its use would cut the journey to a fraction of the time.

The "cheapest" journey to Mars, so far as fuel was concerned, would be by a rocket ship. With an atomic ship, travelling by a more direct route, it need cost only two or three weeks.

**CONQUEST NECESSARY**  
To the critics, Mr. Clarke retorted that the desire to land on the moon satisfied the primary human impulse to explore, and that a warning for those who inhabit the earth in years to come.

There is no doubt that, eventually, sheer necessity will bring about the conquest of other planets.

"Before its evolution is finished the sun will become a hundred times as luminous as it is today, and the sun will be a source of humanity to the outer planets before earth's oceans have begun to boil."

The last quarter of this century will be an age of exploration such as man has never known. Before the year 1950, most of the major bodies in the solar system will probably have been reached by a missile which will take centuries to examine them all in any detail."

He warned "a peculiar fascination" at the prospect of building stations in space, not only for the use of for reducing space ships, but because meteorological observations in space could be made at a glance over the whole of the planet.

**SPACE PLANETS**  
"Planets are far more common than we had believed," he said. "There may be thousands of millions in one galaxy alone."

Mr. Clarke offered a cheering thought for our descendants: "We see how extremely improbable it is that we should be the only intelligent beings in the question of interplanetary warfare can ever arise."

He made one last encounter with almost certainly be subhuman or superhuman—more likely the latter, since our race must be one of the youngest creatures in the universe.

"But if the universe does hold species so greatly in advance of our own, then why have they never visited the earth?"

The answer was simple. Assuming each race existed, they were in the position of a man who could walk along a beach in ten minutes but could not, in the whole of his lifetime, examine every grain of sand on it.

"For all we know," he concluded, "there may be fleets of space ships drifting through the universe."

"Even making the most optimistic assumptions, it is hardly likely that our world would have been visited in the few thousand years of recorded history."

**BOY IN CHANNEL BID**  
Coaxed by Jimmy Ludlow, aged fourteen, four members of the Folkestone Rowing Club were today tempted to beat the Channel rowing record between Folkestone and Dover. Previous time was five hours five minutes.

## BALTIC GIRLS TO WORK IN BRITAIN

**THE** first batch of a thousand girls from Germany are on their way to England to work in hospitals. They are displaced persons from the Baltic States of Lithuania, Latvia and Estonia, all of whom are volunteers and most of whom speak English.

The first 100 of the 1,000 will reach military in two weeks' time. Then they will arrive in groups of 100 twice a week.

All the girls have been carefully "screened" and have passed a severe medical test.

Many of these were students whose studies were interrupted when the Germans closed down their universities, and have been living in the British zone of Germany.

The first batch will go to the St. John's Institute, Highgate, where they will receive the regular rates agreed by the Ruschlik Committee.

Subsequent batches to arrive will go to sanatoria in different parts of the country.

**GREAT-GRANDFATHER M.P.**  
Mr. G. H. Walker, septuagenarian Member of Parliament for Huddersfield (Lancs.), who lives at Kendal, is a great-grandfather. His granddaughter, Mrs. Mary Walker, has given birth to a son. Mr. Walker is the first great-grandfather of the present generation.

**RENT REDUCED IN P.C.**  
Hampstead rent tribunal have reduced from 32s. to 25s. a week the rent of a furnished house in Back-lane, Hampstead. It was announced yesterday.

# WALTER HAMMOND Raises His Cap To CRICKET'S GREAT BOWLERS

ROUGH any decisive answer is impossible, cricketers and lovers of the game never without asking one another: "Who was the greatest bowler who ever lived?" Whose bow was the most of all? Were the giants of the past better men, or worse than the leading players of today?

What an intriguing argument! How many hundreds of times I have heard it debated, in pavilion, train and hotel, all round the most amazing reminiscences of cricketers that I remember is of the looks and words of relief from world-famous Bowler, bowlers when "Old George" dropped out of the game in 1920, and the comic dismay that ran from Somerset to Yorkshire when the retired veteran was recalled, after Notes told Wharfedale so tragically from blood-poisoning.

And this was not because Gunn was the finest batsman in the world. Past Master as he was, magnificent as his scoring record shows him to have been, it was the fact that all bowlers was the feeling that this all time measured up to his actual ability.

**EFFICIENCY AND NONCHALANCE**

★ **WHAT** broke the nerve of everyone who ever ran up to deliver a ball against him was that, half his time, he was smiling. He gave the impression that, it was said, Richard Dadd used to give to bowlers: "If that's all you can do you'd better put someone else on at once."

I have seen him walk quietly down the wicket to meet the fastest bowlers who ever handled a ball, and with the latest kick, he would almost invariably smile, send the ball scorching over the grass past mid-off to the end of the field.

No other cricketer of my time has ever handled a ball so well, certainly I could not do it. The next ball, however, Gunn would cut for four, with the air of a sleepy giant who cuts off the head of a dandelion with a single stroke.

It was because he got out dozens of times, perhaps hundreds of times, because he was more concerned to irritate the bowler than to guard his wicket. He was a man who would cut for half an hour on end, appearing to be a laughing stock.

A teaspoonful of Overbridge each night gives you against infection of throat and chest. As a remedy it breaks up coughs and colds rapidly.

Children love the honey in it.

**"No more  
Stiffness in my  
knees now"**

After months of treatment this man's knee still remained stiff and sore. Then he heard about Kruschen, and writes:—

"I developed a very bad knee. I had treatment for about 3 months, and also had it X-rayed, but there appeared to be nothing wrong. Then I heard of Kruschen Salts. After 1 hour taken a portion of the bottle, the stiffness left me. I can now walk 24 or 24 miles a day."

Rheumatism usually arises from poisons in the bloodstream. If you can cleanse the bloodstream, poisons are not

likely to settle in your joints. Kruschen is a powerful and effective. Because of the Action, Kruschen helps to cleanse the whole system thoroughly.

At present, Kruschen is taken in two forms—the original Cryolite and also a new form called Kruschen's New Salt. Both are equally effective. Each is sold at 1/2 and 3/- per bottle.

**I'm on  
BLADE  
AT WOOLWORTHS**

WALTER HAMMOND

only deliberately demonstrating his tricks, careful of his score. He would slip out a single with the air that showed bowler and spectator alike that he could as easily have scored a four.

Every bowler passed, except Bowler, but he hit the sticks and he could not be taken.

McConnell took him firmly by the arm and led him away to sign on for the county.

No other bowler has possessed the same combination of qualities. He bowled in a sort of dreamy abstraction, as a great artist, and he was never in a hurry. He was absorbed by the science of the game, and he was so sure that he sometimes made the most absurd attempts to simple things, that he could not do anything else during a game.

One of the few who was sensitive and retiring, he was a great violinist; his playing was as beautiful as his cricket. In his spare time he would sit at the piano, and he would play the most beautiful music.

If "Old George" had had his son's solidity of character, or "Young George" had had his father's genius, records would have been made which might have outlasted this century.

Rivalling George Gunn as the Bowler's Ball of All-Time was the genius of the first All-England XI, George Parr. In his first three games for this famous team he scored 100, 78 and 84, each at the highest score in the game, and each against eighteen or twenty opponents in the field.

Short, sturdy, blue-eyed, red-haired and whiskered, he was the greatest leg-side bowler who has ever lived; and also a batsman of the highest order.

**HEFTY HITS IN  
BIG CRICKET**

★ **ONE** of his hits, at Lord's, was a full toss, and ground and over the top of the old Tavern is said to be perhaps a bigger record than any other in the history of the game.

On the old Tavern Bridge ground there was a tree, over the top of which he used deliberately to send the ball whenever he wanted to annoy a bowler particularly; it became known as George Parr's Tree, and a current joke against bowlers at that time was that they could go down the tree and get a drink.

Ranking with Parr among the hardest hitters of all time is C. I. Vernon. In a schoolboy match at Lord's he did what I believe no other cricketer ever succeeded in doing—hitting a ball clean over the top of the old pavilion without a single misadventure.

One of his drives at Brighton was measured and found to be a tree, over the top of which he used deliberately to send the ball whenever he wanted to annoy a bowler particularly; it became known as George Parr's Tree, and a current joke against bowlers at that time was that they could go down the tree and get a drink.

those days, and sometimes, when a personal rivalry developed, the bowler would bowl at the batsman with a more deliberate "bodyline" than he would bowl at anyone else of recent years ever used.

In one match Myer was so punished about the legs and body by Reggie, a five-foot, five-inch, 15-year-old boy, that he was not only unable to bowl in the match but had to leave the ground in a motor car.

He was so punished about the legs and body by Reggie, a five-foot, five-inch, 15-year-old boy, that he was not only unable to bowl in the match but had to leave the ground in a motor car.
